COLLECTION SERIES**

THERAPY

PHYSICIAN DESIGNED ZONE THERAPY™

Whether diminishing the stresses of everyday life, healing a sports injury, relieving aching joints and stiff muscles due to arthritis or simply letting you achieve a good night's sleep - your MAAX® Spas hot tub can help with physician designed Zone Therapy™. Zone Therapy™ utilizes strategically positioned jets to target specific pain zones that contain muscular trigger points. More jets don't necessarily mean a more effective massage. Precisely locating the correct size jet and massaging action where they are most effective is key to bringing total relaxation and soothing relief throughout the entire body.

The Zone Therapy™ concept has been designed by medical specialists in the fields of physical rehabilitation and massage therapy.

CYCLONE MASSAGE JETS

Cyclone massage jets are a series of various jets with either a sweeping motion or stationary stream of water, which were specially designed for use in a MAAX® Spas hot tub.

Cyclone: Designed for smaller, more sensitive areas such as neck, upper shoulders and feet.

LS Cyclone: Designed for mid to large muscle groups such as middle-to-lower back and gluteal.

XL Cyclone: Designed to provide a more intensive massage to larger muscle groups in the lower back.

Cyclone Swirl: Swirling action to ensure smaller, more sensitive areas are properly massaged and relieved.

LS Cyclone Swirl: Swirling action for mid-to-large muscle groups avoiding overstimulation.

XL Cyclone Swirl: Swirling action provides more intensive massage to larger muscle groups in the lower back.

ZONE THERAPY™

Zone Therapy™ utilises strategically positioned jets to target specific pain zones that contain muscular trigger points.

CALF ZONE

Massages the lower leg with 12 deep tissue massage jets, increasing circulation and healing.

SHIATSU SEAT

Shiatsu jetting promotes an invigorating deep tissue massage, using 12 pinpoint placed jets to energise and restore the body.

ZONE 1: SUBOCCIPITAL

Trigger points in the area where the neck meets the back of the head are a common cause of headaches. The Comfort Collar gently cradles your head while targeting this area with an optimally positioned array of Cyclone Jets.

ZONE 2: TRAPEZIUS

Trigger points in this region can contribute to a feeling of heaviness and pain across the shoulders, and upper back. An array of Cyclone Jets target these sensitive areas, providing an improvement in blood circulation and gently dissolve away the feeling of tension.

ZONE 3: PARASPINAL

Increased tension in the back muscles on either side of the spine can be linked to many medical conditions. An effective combination of Cyclone, LS Cyclone Swirl and the large XL Cyclone Swirl Jets provide soothing stimulation for unsurpassed body relaxation.

ZONE 4: LUMBOSACRAL

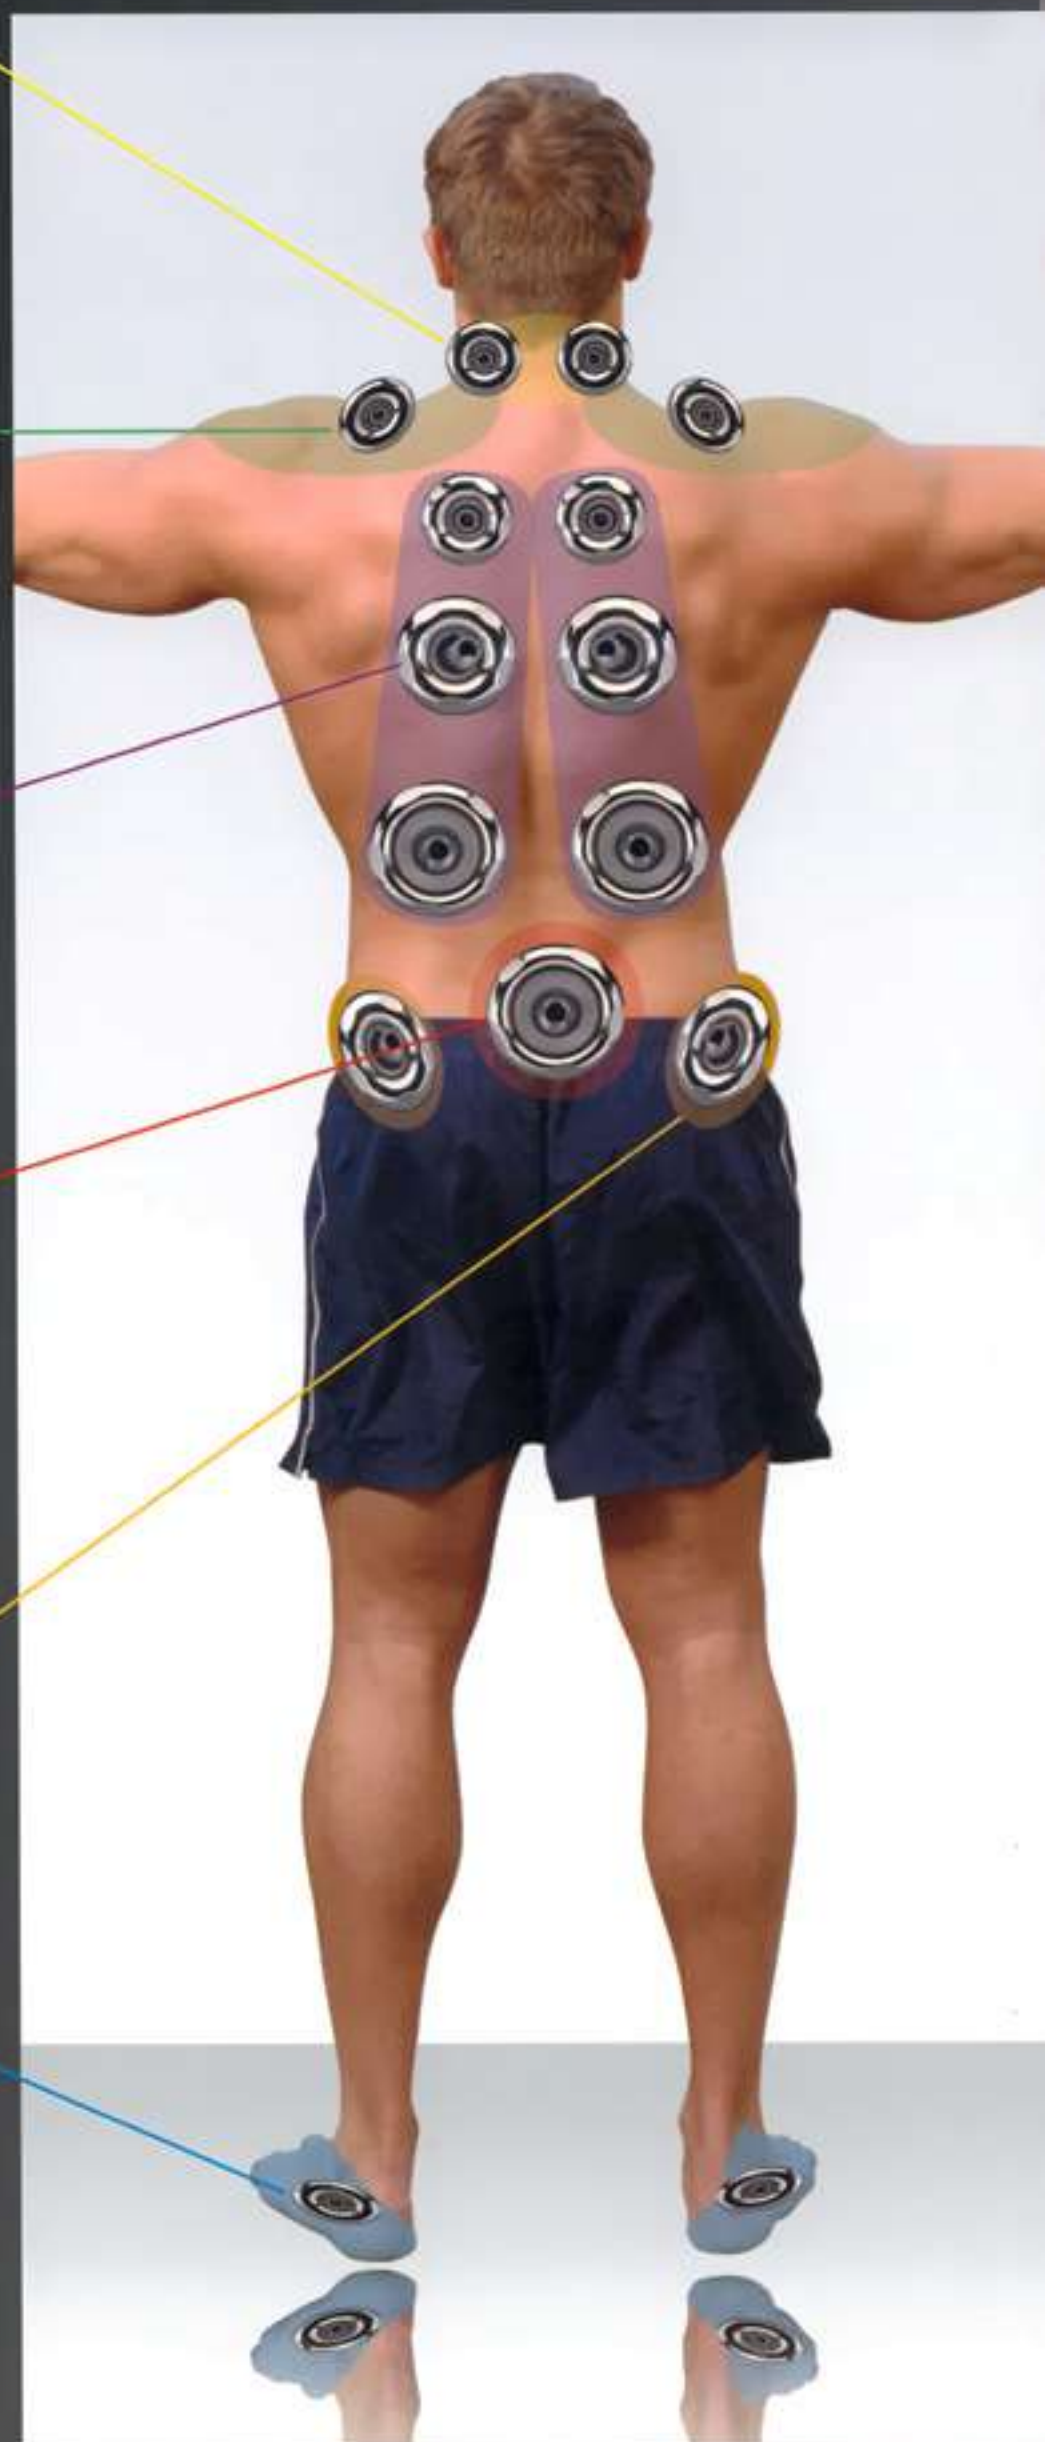

Lower back pain is something most of us will experience. Back pain is linked to excess tension and muscular trigger points in the lower back. The large XL Cyclone Swirl Jet with its broad, swirling motion provides an invigorating massage to the lower back to loosen your knots of tension and bring relaxing relief.

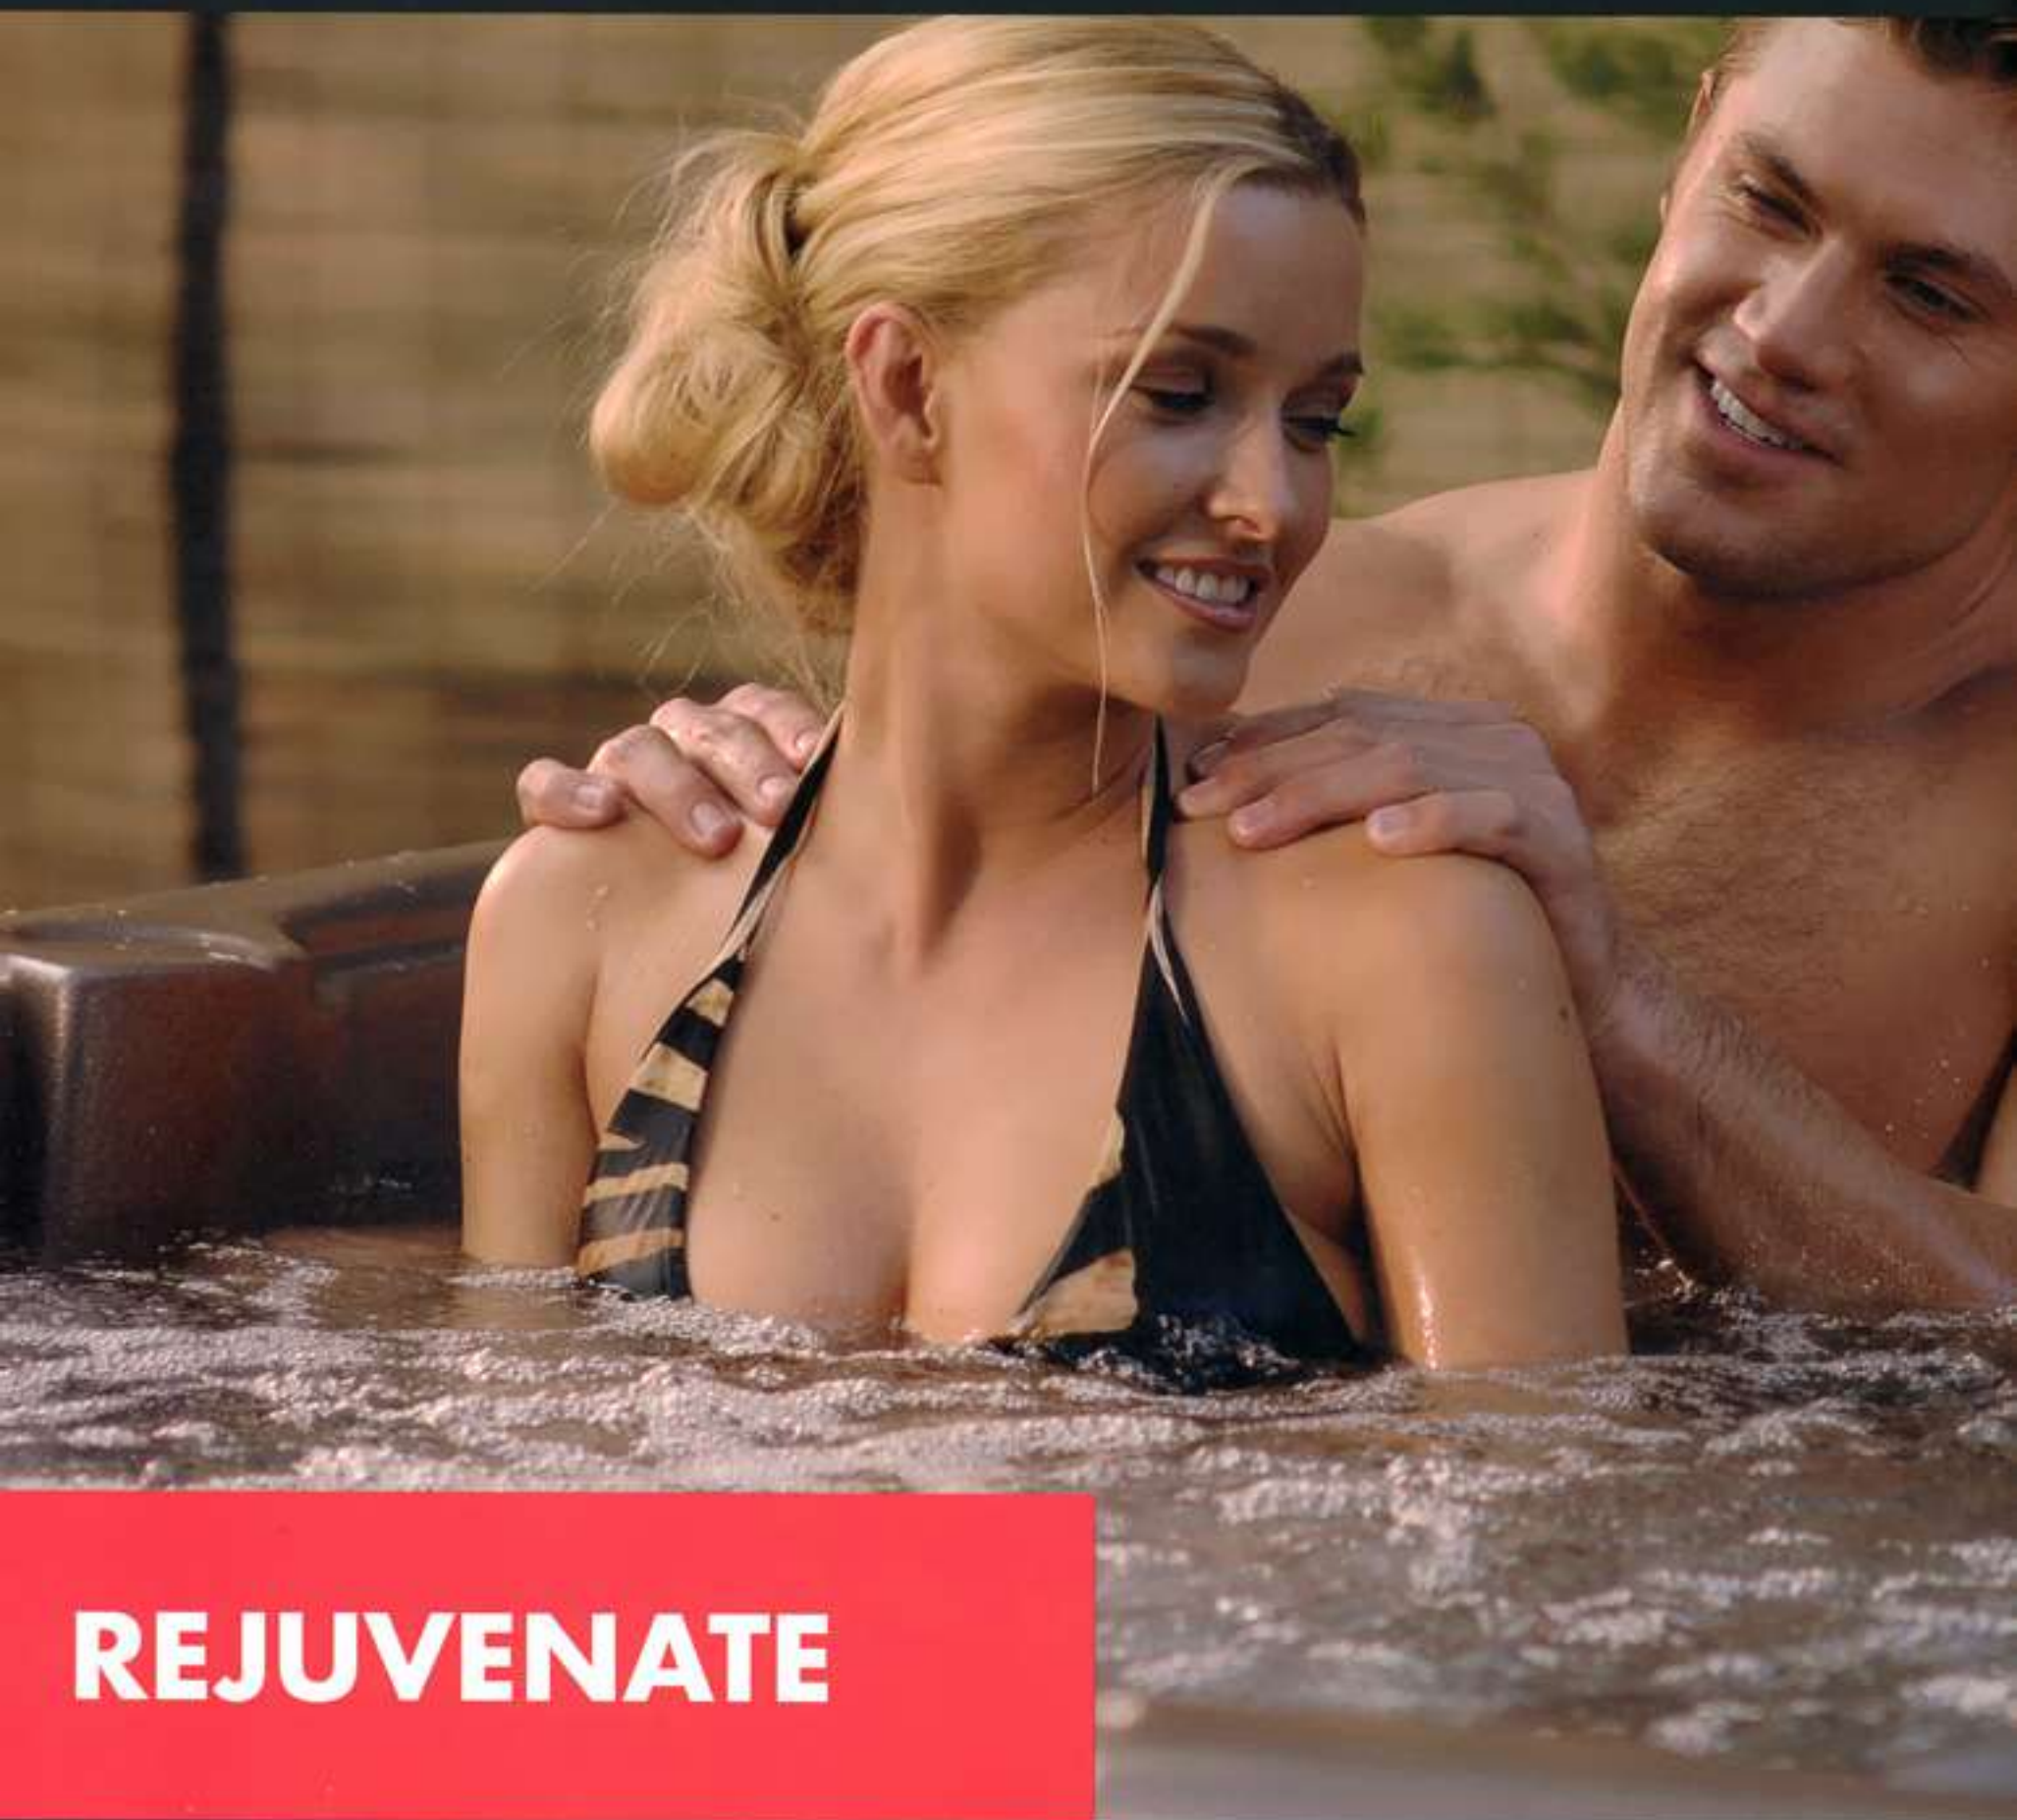

ZONE 5: GLUTEAL

Sitting can lead to increased tension and muscular trigger points surrounding the hips and upper thighs. LS Cyclone Swirl Jets smartly positioned at the sides of the seat bring you a stimulating massage to dissolve tension in these muscles.

ZONE 6: FOOT RELIEF ZONE™

Many important nerve endings in the feet connect to all parts of your body. Sore and tired feet can affect how we feel all over. The ingenious Foot Relief Zone™ targets the upper and lower parts of the feet with invigorating streams of water that provide relaxation throughout the body.

REJUVENATE

COMFORT COLLAR

A neck therapy jet massage system is one of the most relaxing features in a spa. That's why MAAX® Spas has engineered the reverse moulded Comfort Collar. This unique cushion wraps around your neck, gently cradling your head while adjustable cyclone jets massage neck

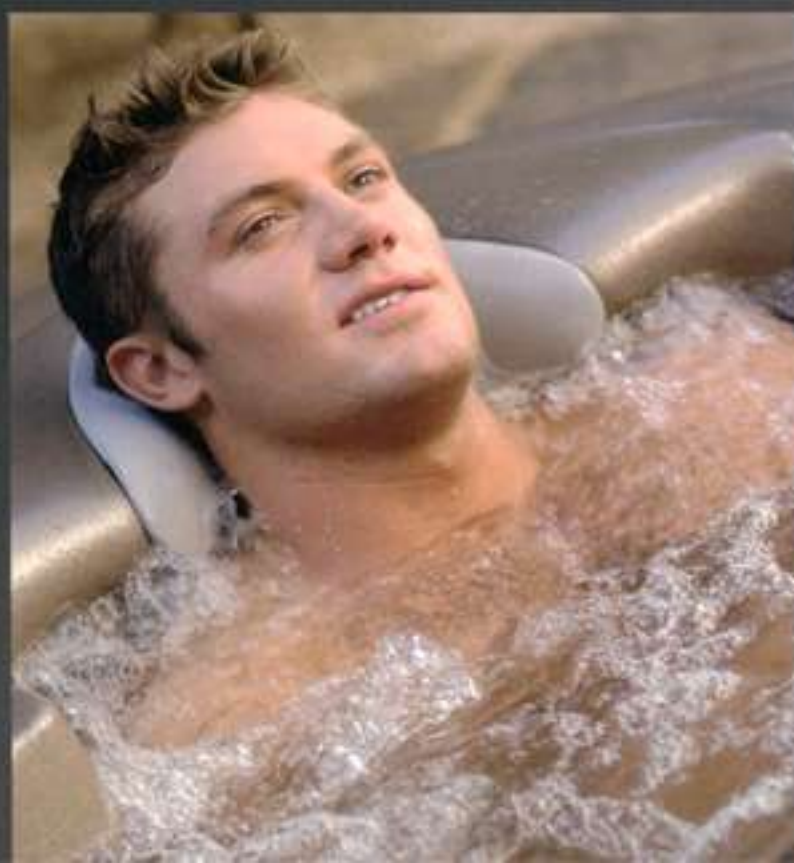

and shoulder muscles. The Comfort Collar also gives a relaxing massage above the water line, like having your neck massaged by a loved one. This hallmark feature is a reason many have already chosen MAAX® Spas hot tubs.

X-SERIES COLLAR

The convenient X-series increases the seat size in the deep corner seat for physical freedom of movement and enhanced comfort for those who need it. Four strategically placed cluster jets provide a deep tissue neck massage to targeted pressure points, relieving tension.

COMFORT

PERFORMANCE SEATING™

Comfortable seating is a top priority in the design of every MAAX® Spas hot tub. With a wide variety of seating styles available, you'll find the perfect model to fit your shape and size. Depending on the model you prefer, seating ranges from an open style to those designed to keep you in position so the jets can work their miracles. You'll find each engineered to scientifically balanced ergonomic support, water pressure, jet position and body buoyancy. Deeply contoured seating provides ultimate comfort, while arm-rests and foot wells seem to mould to your body.

Performance Seating™ has earned us the reputation of having the most comfortable spas in the industry. Each seat is designed to provide full body immersion and proper posture, in harmony with their respective jetting pattern, for superior comfort and performance. Built-in comfort collars cradle your head while side bolsters hold your body in an ergonomic position. Built-in lumbar support also contours to the curvature of the spine which provides correct posture, reducing stress on your lower back.

DISTINCTIVE SHAPE

The distinctive shape of the MAAX® Spas hot tub emerged from an effort to increase room in the foot well area while lowering the overall height of the spa to respect sight lines in the site design. It has become one of the most appealing exterior concepts of MAAX® Spas hot tubs. This concept allows MAAX® Spas hot tubs to be added to any garden design without visual interference.

STEREO COMBINATION

With a MAAX® Spas Sony® stereo/CD combination, sound resonates through the water from a subwoofer integrated into the spas interior substructure, allowing you to not only hear, but also to feel, your desired music. Your favourite play lists and satellite radio are just a touch away with the Sony satellite ready stereo and MP3 connection technology.

3-WAY RETRACTABLE SPEAKERS

Durable 3-way retractable speakers rotate inward for an intimate spa setting, or up to 180 degrees outward for garden entertaining.

SUBWOOFER

With a MAAX® Spas Sony® stereo/CD combination, sound resonates through the water from a subwoofer integrated into the spas substructure, allowing you not only to hear, but also to feel your music.

TECHNOLOGY

AFTER-HOURS LIGHTING PACKAGE

Functional and beautiful, the After Hours Lighting Package illuminates spa controls while changing colour in sync with the interior and exterior lighting.

EASY TOUCH™ FLOATING REMOTE CONTROL

Optional Easy Touch™ Remote Controls on selected models allow jet control, turbo boost and lighting from anywhere in the spa. The wireless infrared design comes in a waterproof case and even floats for extra convenience. Easy and fun to use, it's another unique addition to the ultimate spa experience.

INTERIOR SPA MONITOR ACCESSORY

Adjust your spas heat and power the jets before you even step outside with our innovative wireless spa monitor. This advanced spa monitor displays water temperature while checking the health of your spa. An audible alert will sound for power outages or equipment fault.

SOLID STATE CONTROLS

The MAAX® Spas easy to read control panel allows you, with the touch of a button, to change the temperature, adjust lighting or control your massage. The reliability of these solid state controls centre around gold piezo electric switches and marine grade construction.

POWERWORKS™ WITH M7 TECHNOLOGY

An advanced, state of the art spa controller provides the ultimate in ease of use, safety and reliability for every spa user. The Powerworks™ with M7 technology is a revolutionary new hardware/software platform that completely eliminates mechanical sensor switches and remote through-wall temperature sensors. The M7 platform features two identical solid state sensors that are mounted inside the heater manifold. These Smart Sensors accurately and reliably measure water temperature while monitoring critical water conditions without the possibility of failure due to mechanical switch malfunction.

PURITY

FILTRATION

Perfect moments deserve perfect, crystal clear water. The water maintenance of your spa is made easy by the features of the MAAX® Spas complete balanced filtration and cleaning system. Water is first drawn into the system from both the upper skimmer and lower foot well areas. The High-Velocity Skimmer draws water into the filter system to capture surface debris and contaminants. Our 100% filtration means every drop of water is filtered before reaching the Powerworks™ 48 frame pump as our high volume filter cycle cleans your spa water 4 to 6 times per hour. Glistening clean water, in a moments notice.

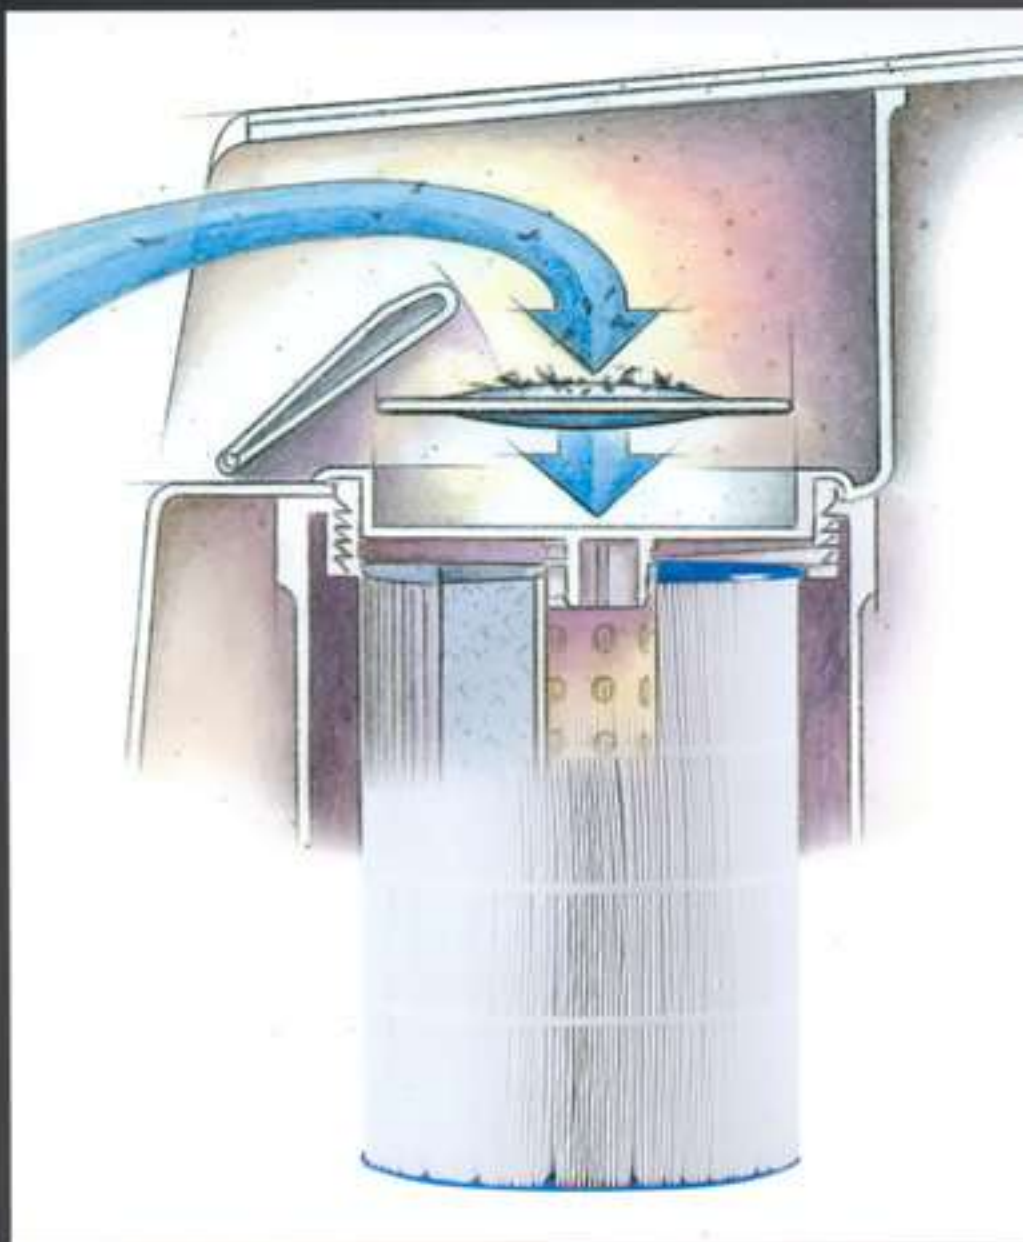

48 FRAME PUMP

The hardest working and perhaps the most important component of a spa is the pump. Each basic function, from the heating and filtering of the water to providing a powerful and soothing massage, depends on the pump system. For this reason MAAX® Spas hot tubs utilise industrial duty dual-speed 48 frame pumps in all of their models. MAAX® Spas hot tubs utilise motors that run cooler for longer life, have lower amp draw for lower operating cost and have the ability to handle higher torque loads for superior performance.

FIRST LINE OF DEFENCE

We've taken things a step further as our unique First Filter™ removes silt and fine particulates that would pass undetected through an ordinary filter. The skimmer basket traps larger materials such as leaves and debris - and the basket is then easily removed for quick cleaning.

CLEANZONE™

Clean water is the cornerstone of spa enjoyment. MAAX® Spas CleanZone™ water purification system will automatically maintain healthy, crystal clear water while greatly reducing chemical maintenance. CleanZone™ is an ultraviolet plasma cell ozone system that disinfects and cleans your spa water. And best of all, CleanZone™ does not require any cleaning or maintenance whatsoever. Worry-free enjoyment, throughout the life of your spa.

CLEANZONE II™

The CleanZone II™ system combines the power of UV-C light and ozone, the same technology utilized in many communities around the world to purify drinking water. CleanZone II™ kills 99.9% of micro organisms, bacteria, viruses and parasites while oxidizing debris left behind. This system is the perfect blend of hygiene, purity and technology.

INSULATING COVERS

MAAX® Spas premium grade insulating covers are designed for maximum heat and moisture retention. The unique, tailored fit design keeps water from evaporating while maintaining the perfect spa temperature. The cover also acts as an important safety barrier to the spa. The Heat Seal Gasket locks in heat and moisture, saving money and requiring less maintenance.

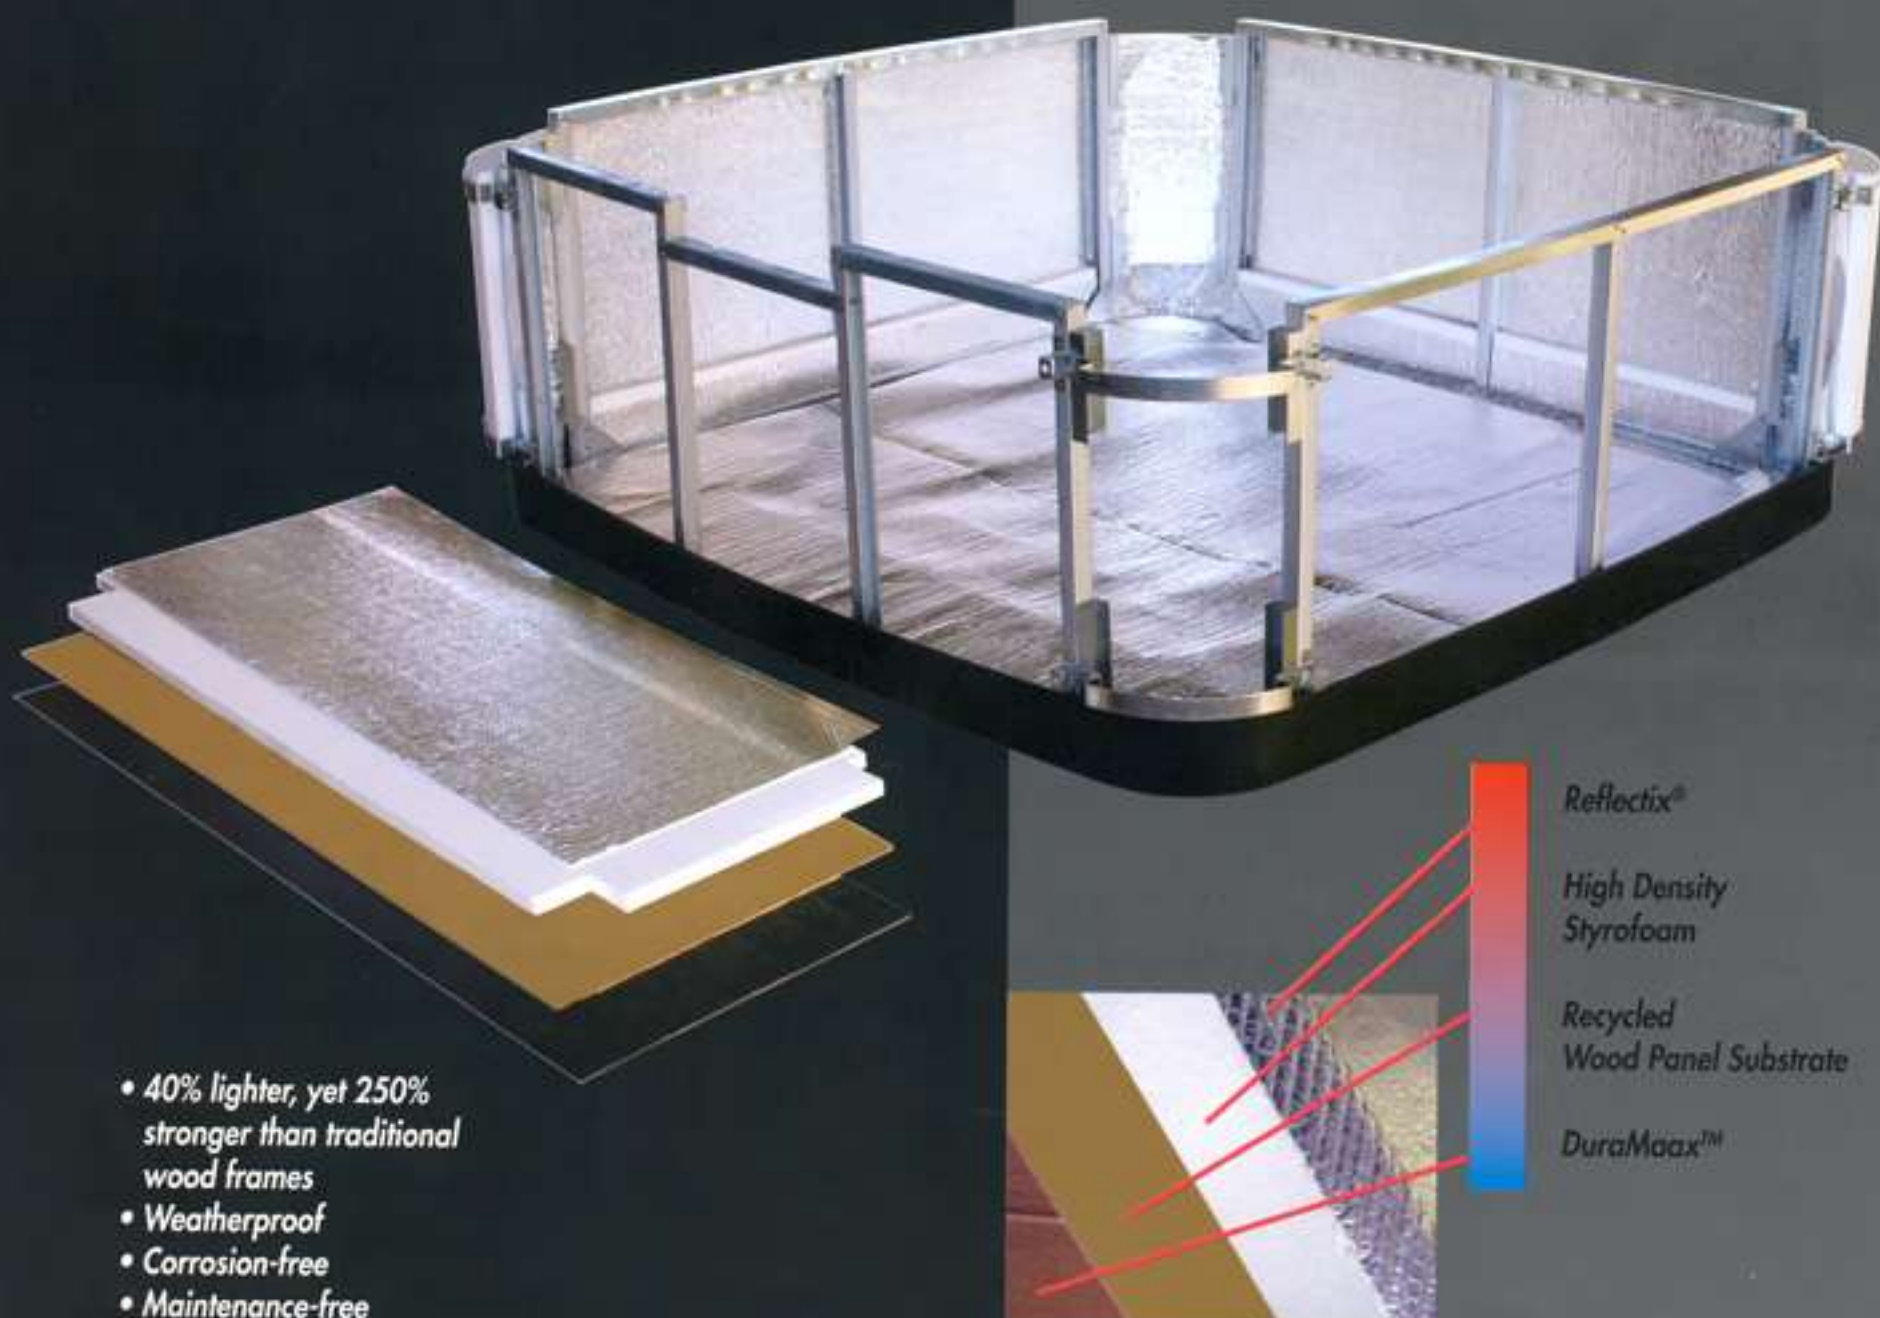

ZINC COATED STEEL SUBSTRUCTURE

The zinc coated steel substructure used in MAAX® Spas units has the highest strength to weight ratio of any building material available. The light-gauge steel frame provides greater structural integrity than wood, as well as superior corrosion protection for a much longer life. Unlike wood, steel is dimensionally stable. It will not

expand or contract with moisture, which over time can damage the spa's exterior. Sturdy and built to last, the inorganic properties will never rot, warp, split or crack and eliminate worries of animal infestation or termite damage. Stronger, more durable and ideal for the environment – it's the obvious choice for a lifetime of worry-free fun.

ABS SEALED BASE

The ABS Sealed Base is an integral part of the support structure in a MAAX® Spas hot tub. The base interlocks with the steel frame and the spa shell to form an incredibly strong foundation for the spa to rest on. Its one-piece construction provides a rugged, yet aesthetically pleasing foundation that truly seals the bottom of the spa, locking in heat and sealing out moisture. Extremely durable and maintenance-free, it's the perfect platform.

- 40% lighter, yet 250% stronger than traditional wood frames
- Weatherproof
- Corrosion-free
- Maintenance-free

THERMOLOCK IV™

Thermolock IV™ is the ultimate in sound and heat energy management. The unique thermal barrier technology recycles radiant heat energy for faster, more efficient heating and reduced energy costs. High-density foam insulation is applied to the sealed ABS base, which locks in the frame and prevents heat loss through the floor. All four sides, plus the floor, are lined with patented

THERMO- LOCK IV™

Reflectix® insulation and high density foam to create an thermal barrier within the interior air space. Radiant heat energy from the pumps and equipment reflects back to the spa and is absorbed into the plumbing. This helps raise and maintain water temperature, improving heat efficiency. Energy created by the spa stays in the spa, and worry-free enjoyment is all that remains.

QUIET

The same insulation that makes a MAAX® Spas hot tub energy efficient also aids in its quiet operation. This, combined with rubberised shock absorbers on the pumps, makes it extremely quiet. Quiet operation is essential to ensure a peaceful and relaxing experience throughout the entire garden environment.

SERVICE

Should your MAAX® Spas hot tub ever need maintenance, you can feel at ease. Your new MAAX® Spas can be serviced and put completely back together to factory specifications. This is not possible with conventional foam-filled hot tubs as these older designs are extremely hard to service and are typically damaged in the process. It is very costly to bring these older designs back to factory installation specifications.

Servicing a Foamed Filled Spa

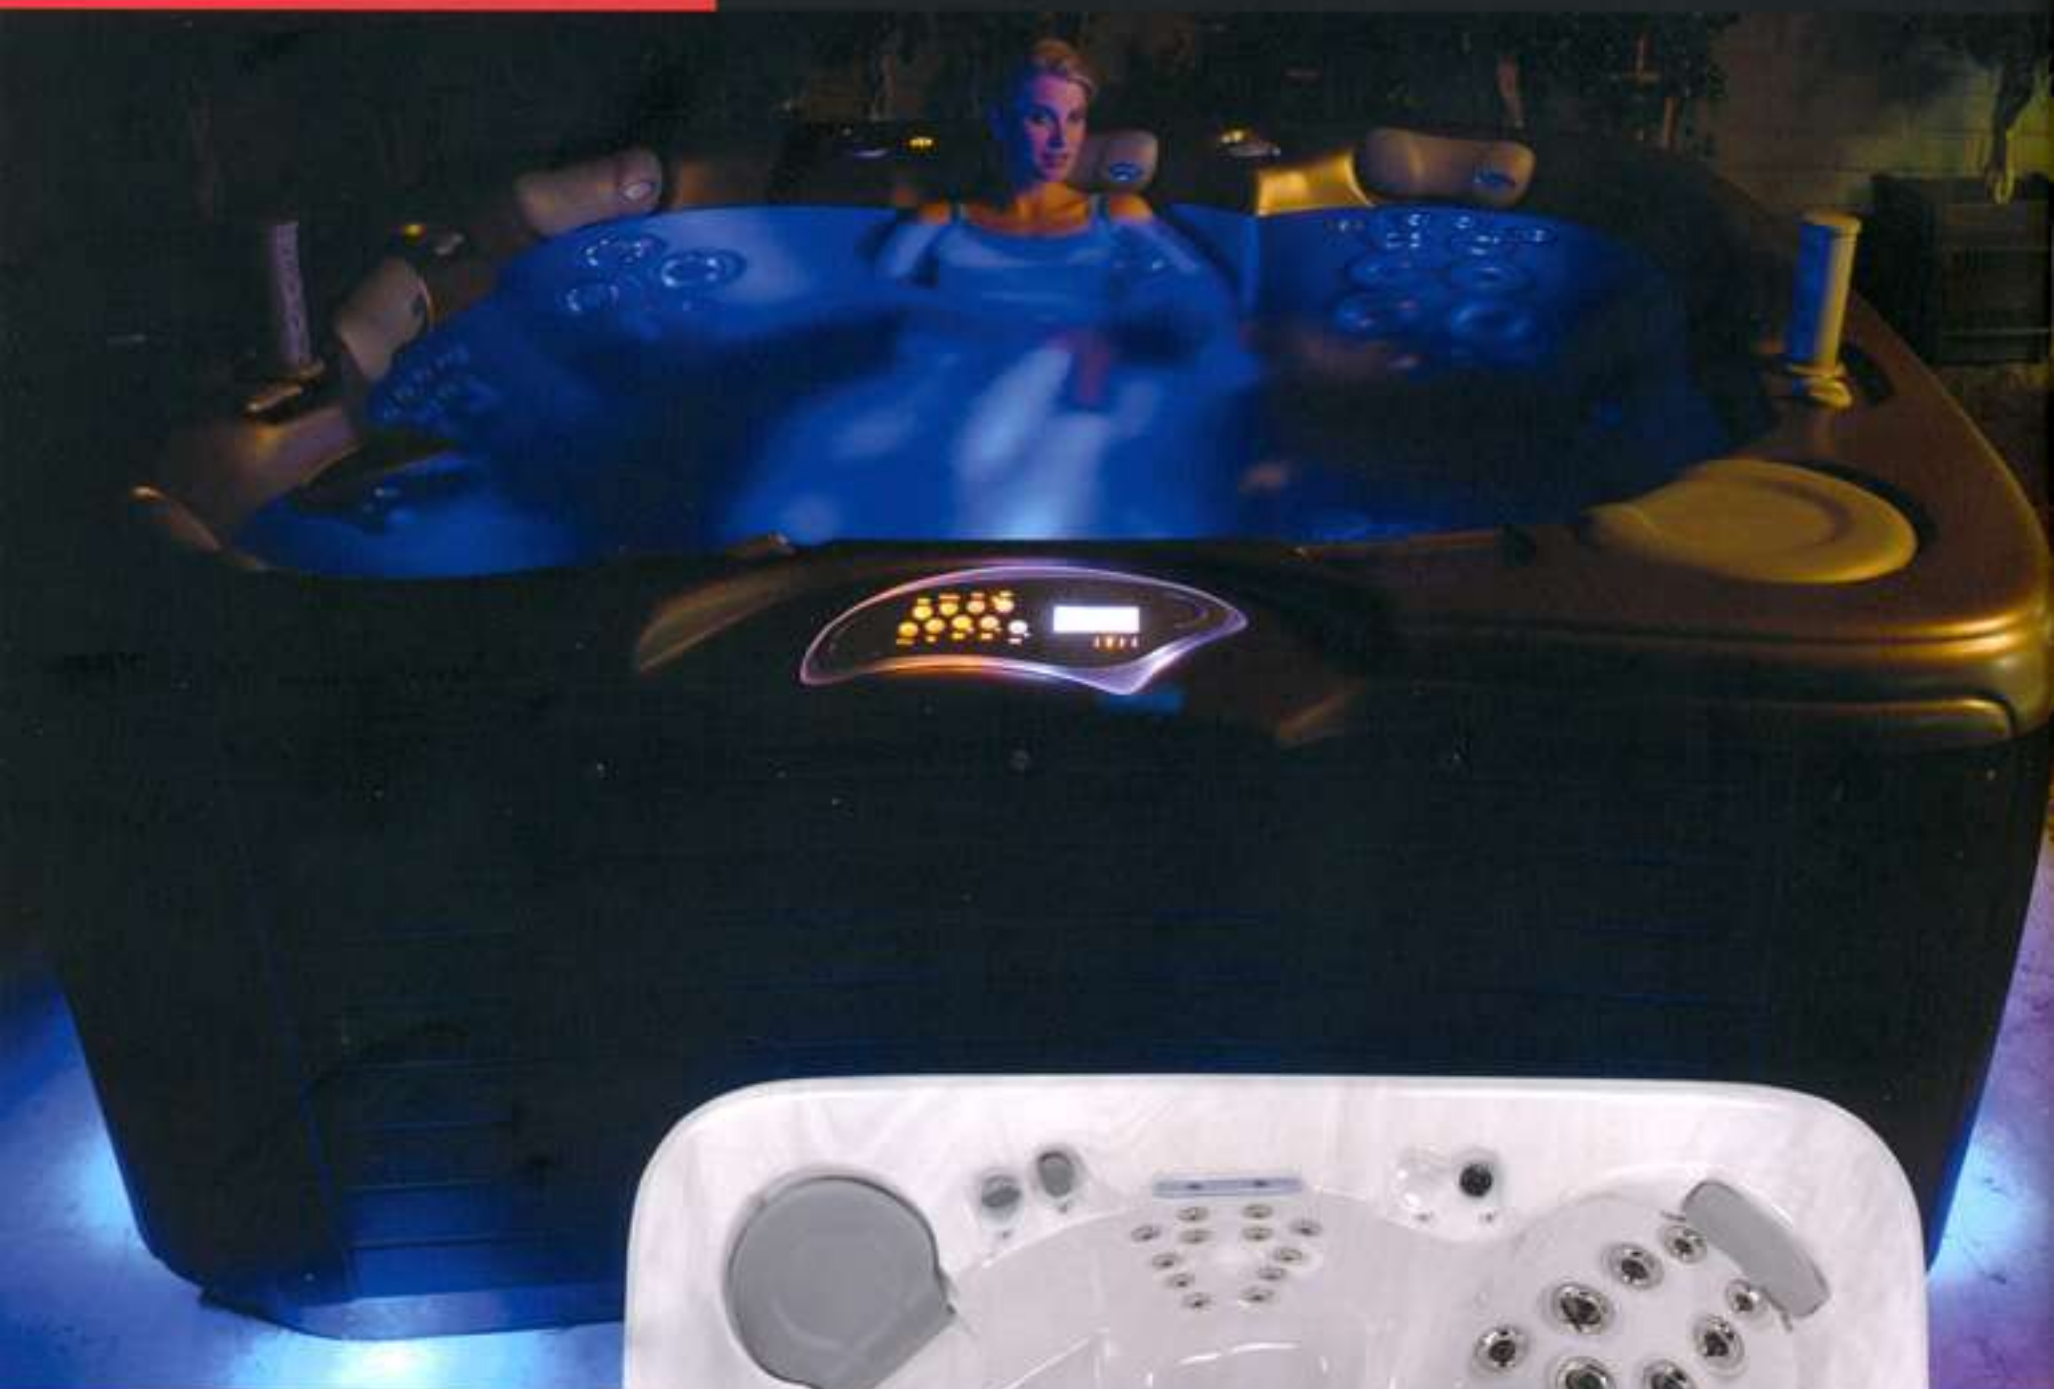

The new MAAX® Collection spas are an upscale line of state-of-the-art designs. MAAX® Collection refines the very essence of style and wellness in a spa. From the ergonomic features to the sophisticated massage systems, the MAAX® Collection is the perfect blend of hydrotherapy, purity, and technology, featuring the most advanced water quality system in a spa. There are five specially designed seating areas combined with the physician designed Zone Therapy™ jetting. 40 years of innovation culminate in the ultimate home spa experience.

MODEL M780

The MAAX® Collection Series M780 model is the spa equipped with the largest number of seats. Up to seven persons can enjoy the ultimate spa sensation together. The M780 has everything a modern spa should offer. This is illustrated by the relaxing seats which provide you with an excellent position to have a good conversation or enjoy your favourite music.

MODEL M780

Suitable for 7 adults

Dimension: 233 x 233 cm, 89 cm high

Volume: 1514 litres

- 80 stainless steel jets, including neck and shoulder jets
- Love seat
- Shiatsu seat
- Full body massage in sitting position
- Zone Therapy™
- Thermolock IV™ insulation

- Zinc coated steel substructure
- ABS sealed base
- DuraMaax™ cabinet
- Integrated ozone generator
- CleanZone II™ UV system
- Spa monitor
- Deluxe cover
- Underwater coloured LED spa light
- Exterior perimeter LED lighting
- Rail lights
- Illuminated waterfall feature
- Turbo air injection
- Sony stereo including AM/FM, CD, MP3 plug and 2 speakers
- Comfort Collar

Technical: 3 pumps (1 two-speed, 2 single speed), 3kW heater

Connection: 230V 2PH-N-PE

MODEL M781

A MAAX® Collection M781 spa is equipped with a Dynamic Jet Sequencer Lounger. This lounger can perform various massage programs to fulfil all your massage wishes. Choose a therapeutic massage or an indulging massage. Just decide and enjoy. The spa monitor even enables you to set the spa from the house, so you just have to get into the spa and start relaxing.

MODEL M781

Suitable for 5 adults

Dimension: 233 x 233 cm, 89 cm high

Volume: 1514 litres

- 71 stainless steel jets, including neck, shoulder and AccuPressure jets
- Ergonomically designed Dynamic Jet Sequencer lounger
- Shiatsu seat
- Full body massage in sitting position
- Zone Therapy™
- Foot Relief Zone™
- Thermolock IV™ insulation
- Zinc coated steel substructure
- ABS sealed base
- DuraMaax™ cabinet
- Integrated ozone generator
- CleanZone II™ UV system
- Multifunctional remote control
- Spa monitor
- Deluxe cover
- Underwater coloured LED spa light
- Exterior perimeter LED lighting
- Rail lights
- Illuminated waterfall feature
- Turbo air injection
- Sony stereo including AM/FM, CD, MP3 plug and 2 speakers

Technical: 3 pumps (1 two-speed, 2 single speed), turbo-boost air blower, 3kW heater

Connection: 230V 2PH-N-PE

The M705 is the ideal spa for two people who want a massage in a recumbent position at the same time. One lounger has a Foot Relief Zone™ for an optimum foot massage. In addition to this, the M705 is equipped with arm rests that can massage the upper and forearm.

MODEL M705

Suitable for 5 adults

Dimension: 234 x 229 cm, 89 cm high

Volume: 1514 litres

- 53 stainless steel jets, including neck and shoulder jets
- 2 ergonomically designed loungers
- Full body massage in sitting position
- Arm rests
- Zone Therapy™
- Foot Relief Zone™
- Thermolock IV™ insulation
- Zinc coated steel substructure
- ABS sealed base
- CleanZone™ UV system
- DuraMaax™ cabinet
- Floating remote control
- Auxiliary 4-button controller
- Integrated ozone generator
- Deluxe cover
- Underwater coloured LED spa light
- Exterior perimeter LED lighting
- Comfort Collar

Technical: 3 pumps (2 two-speed, 1 single speed),
3kW heater

Connection: 230V 2PH-N-PE

The Performance Series 482 has comfortable seating for five with a performance lounge and a standard lounge, allowing you to unwind together. The unique design offers a conversation area. The Performance Series 482 provides the Foot Relief Zone™ and Zone Therapy™ targeting both the upper and lower parts of the feet and back.

MODEL 482

Suitable for 5 adults

Dimension: 234 x 234 cm, 89 cm high

Volume: 1685 litres

The spa shown is equipped with the X-Option Collar

- 63 jets, including neck, shoulder and AccuPressure jets
- 2 ergonomically designed loungers
- Illuminated waterfall
- Zone Therapy™
- Foot Relief Zone™
- Thermolock IV™ insulation
- Zinc coated steel substructure
- ABS sealed base
- DuraMaax™ cabinet
- Integrated ozone generator
- Deluxe cover
- Underwater coloured LED spa light
- Rail lights
- Comfort Collar
- Auxiliary 2-button controller

OPTIONS:

- CleanZone II™ UV system
- Stainless steel jets
- Floating remote control
- Exterior perimeter LED lighting
- X-Option Collar

Technical: 2 pumps (1 two-speed, 1 single speed), turbo-boost air blower, 3kW heater

Connection: 230V 2PH-N-PE

MODEL 481

The Performance Series 481 can seat six comfortably with bucket seating and a performance lounge and also offers the Foot Relief Zone™ for the ultimate spa experience. Extra space and an oversized foot well ensure additional room to stretch.

MODEL 481

Suitable for 6 adults

Dimension: 234 x 234 cm, 89 cm high

Volume: 1720 litres

The spa shown is equipped with the X-Option Collar

- 63 jets, including neck, shoulder and AccuPressure jets
- Ergonomically designed lounger
- Shiatsu seat
- Illuminated waterfall
- Zone Therapy™
- Foot Relief Zone™
- Thermolock IV™ insulation
- Zinc coated steel substructure
- ABS sealed base
- DuraMaax™ cabinet
- Integrated ozone generator
- Deluxe cover
- Underwater coloured LED spa light
- Rail lights
- Comfort Collar
- Auxiliary 2-button controller

OPTIONS:

- CleanZone II™ UV system
- Stainless steel jets
- Floating remote control
- Sony stereo including AM/FM, CD, MP3 plug and 2 speakers
- Exterior perimeter LED lighting
- X-Option Collar

Technical: 2 pumps (1 two-speed, 1 single speed), turbo-boost air blower and 3kW heater
Connection: 230V 2PH-N-PE

The Performance Series 480 is one of the largest spas in the Performance Series. It offers six barrier-free seats, two comfort collars and a variety of jet patterns. This is the perfect spa for entertaining guests in your garden retreat.

MODEL 480

Suitable for 7 adults

Dimension: 234 x 234 cm, 89 cm high

Volume: 1647 litres

The spa shown is equipped with the X-Option Collar

- 62 jets, including neck, shoulder and AccuPressure jets
- Ergonomically designed positions
- Shiatsu seat
- 2 illuminated waterfalls
- Zone Therapy™
- Thermolock IV™ insulation

DURAMAAX™ SIDING

DuraMaax™ siding is a state of the art wood alternative that has the look and feel of natural wood without the maintenance. The material is impact resistant, impervious to weather or insect damage and will never splinter, crack or rot. The attractive exterior locks in heat and seals out cold air - providing your garden with a beautiful look and feel.

DESIGNED TO LAST

Technically and functionally superior, your MAAX® Spas hot tub has been designed in association with medical and engineering professionals to deliver years of trouble-free enjoyment. Every aspect of the spa, from its structure to the mechanical operation, is recognized

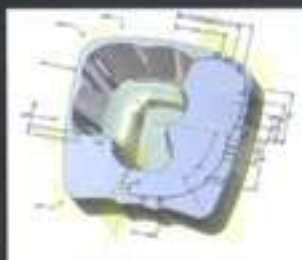

as industry leading. Additionally, over 300 quality control check points are personally inspected by in-house engineers to ensure every step of the manufacturing process is up to the standards our reputation demands.

CONFIDENCE

WARRANTY

To ensure your confidence, MAAX® Spas hot tubs offer an industry-leading warranty against structural, surface and cosmetic defects, as well as water loss and failure in mechanical or electrical equipment. Furthermore, our Zinc Coated Steel Substructure is covered by a lifetime structural guarantee.

GARDEN DESIGN

Today gardens everywhere are being transformed into outdoor living areas, a true extension of the home. They reflect the architecture and design of the home and are becoming relaxing retreats reconnecting you with loved ones and nature. Your new MAAX® Spas hot tub is designed to be the focal point of your garden retreat. Thoughtful design in a wide array of colours and acrylic textures allows the spa experience to seamlessly integrate into your garden, the way MAAX® Spas intended. Now create your perfect garden retreat with MAAX® Spas.

AESTHETICS

ILLUMINATED WATERFALL

Enjoy the soothing sound of the eye-catching illuminated waterfall feature.

LIGHTING

Built-in internal and external lighting illuminates the spa for both safety and romance.

A selection of unique colour options further enhance an already perfect evening, taking garden fun to soaring new heights.
